Data

The Universal Service Administrative Company provides 2016-present E-rate data openly at <https://opendata.usac.org/browse>. There are fifteen different datasets available relating to E-rate. This report focuses on the “E-rate Recipient Details And Commitments” dataset providing information on commitments made to entities. We access the data once per week via the API, filter the data to eliminate any recipients or billed entities that are clearly public schools or public school systems, and calculate the estimated committed dollars at the recipient level. Our dataset then includes individual libraries, library systems, non-instructional facilities (NIFs), many (but not all) of which can also be found in the IMLS PLS dataset. For this analysis, we have further filtered the data to only entities which can be found in an IMLS PLS dataset from 2016-2019. Only IMLS PLS Outlets have FSCS_SEQ codes. If our data includes an entity which can only be found in the IMLS PLS AE (administrative entity) data, it will have an FSCS_SEQ code of 999. This is unique to our data and not reflected in the IMLS data.

Analysis in this report is reflective of data through January 13, 2023. Data can change at any time due to additional commitments in the current funding year and in the past funding years due to audits, refunds, or appeals.

The dataset used for this analysis should be cited as the following: E-rate Recipient Details And Commitments Dataset, <https://opendata.usac.org/E-rate/E-rate-Recipient-Details-And-Commitments/avi8-svp9>.
